PETER YOUNG

DIGITAL FINE ART PRINTS

A digital fine art print is a high-quality reproduction of an original painting, which provides an affordable alternative to the purchase of the original and allows the image to be shared by a wider audience. The use of UltraChrome® pigmented inks together with precise tone control enables a near-perfect rendering of the original colours. Printed on pure cotton-rag artist paper they meet the highest archival standards and ensure an exceptionally long-lasting picture quality.

The Alpine Collection features 64 mountain paintings from 1989 to 2012, including all the ones exhibited in Arlesheim in March 2013 and many that were shown in the annual exhibitions of the Guild of Swiss Mountain Painters.

If you would like to order a print of one of the images from this collection, or indeed of any of my other landscape paintings, please feel free to contact me.
